

The Monroe 8130 Calculator

A new standard for heavy-duty desktop calculators. Like all Monroe calculators, the 8130 calculator comes with a built-in feature no other machine can offer: years of experience dating back to 1912. Experience gained by decades of listening to customers, analyzing calculation needs, and then designing and building machines that answered those needs.

Uncompromising Performance

Fingertip availability of a wide array of productivity oriented features make the Monroe 8130 the intelligent choice for today's needs and future demands.

Legendary Durability

Monroe's 8130 calculator continues the time-honored tradition of exceptional reliability and longevity made possible by solid construction and quality parts.

Purposeful Innovation

Our unique internal paper roll prolongs printer life and reduces costly repairs and downtime caused by printer failures while maintaining a sleek aesthetically pleasing profile.

Fast

A 5.0 lines per second print speed assures results are available quickly.

Specification

Calculating Capacity	12 digits
Print Speed	5.0 lines per second
Print Height	.12"/3 mm
Print On/Off Switch	Simultaneous print & display, or display only
Paper Advance Speed	13 lines per second
Independent Memory	1
Decimal Selector	+, F, 0, 1, 2, 3, 4, 6 with decimal override
Output	Fixed or floating
Input	Floating
Keyboard	15 level buffered
Rollover	2 keys
Dimensions (inches)	9.5" (W) x 15.3" (D) x 3.7" (H)
Dimensions (millimeters)	241 mm (W) x 388 mm (D) x 94 mm (H)
Weight	4 lbs. 14 oz./2.19 kg
Power Requirements	115V AC, 50/60 Hz (Standard) 220V AC, 50 Hz (Optional)
Operational Environment	41° F (5° C) at 10% relative humidity 104° F (40° C) at 95% relative humidity
Storage Environment	-40° F (-40° C) to 158° F (70° C)

Special Features

- Price/Price Mode
- Price/Units Mode
- Units/Units Mode
- Summations (x & totals)
- Running Subtotal on Printer
- Two-Column Addition
- Underflow
- Reverse Underflow
- Paper Saver Mode
- Set Round Option to Truncate
- Set Round Option to Round Up
- Set Identifier for Each Entry
- Variable Add Mode
- Nickel Rounding
- Extended Capacity
- Calculator Mode Correction

Additional Features

Larger Easy-to-Read Display. Used in conjunction with, or independent of printed output.

Automatic Punctuation and Grouping. For hundreds, thousands, etc. **Non-Add/Date Key.** Four function ability: 1) date format with space between month, day and year, 2) non-add entry, 3) store and recall the date or an amount, or 4) override display to print amount.

Automatic Clearance. When turned on, an indication prints showing all registers are cleared.

Error Indication. Prints when a mathematically impossible operation is attempted, such as dividing by zero; automatically clears only the affected register.

Red Print. All credit entries and negative results.

Storage. Accumulator, GT Register, 1 Memory Register, 3 N-Count Registers, Calculator Register and #/Date Register.

Independent Group & Grand Totals. Addition/subtraction totals and multiplication/division results.

Square Root Function.

Percent Key. Add-on and discount capability.

Indicator Lamps. Accumulator, GT and Memory Registers.

Clear Accumulator Indicator. Unique symbol *+ for addition *- for subtraction that prints with the first entry into the Accumulator.

Electronic Keyboard Interlocks. Prevents double entry when two or more keys are depressed simultaneously.

Overflow Indication. Prints when any numeric entry or result exceeds the capacity of any register. Automatically clears only the affected register.

Internal Paper Roll. Protects paper tape from tearing, dust, feathering, obstruction, etc.

Markup

Percent Change
