

Swintec® 512DP ELECTRONIC CALCULATOR

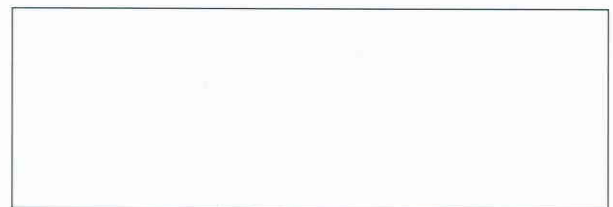

Features

1. **Bright Display:** Blue fluorescent display provides easy-to-read verification of entries prior to printing. 12 large digits with grand total indicator. Comma separates each series of three digits. Running subtotals enables checking of entries and results.
2. **Paper Feed Key:** When key is depressed, paper will advance.
3. **Sign Change Key:** Reverses the arithmetic sign of the number.
4. **Decimal Point Selector:** Controls selection of number of decimal places to be expressed in calculation result.
5. **Round-off Switch:** Round-up, round-down and round-off (5/4).
6. **Print and Display Selector Switch:** Can be switched to either Print only (P), Display only (NP) or Print Display and Grand Total (GT). Add Mode is provided in addition and subtraction with Add Mode Override in multiplication.
7. **Mark-up Key:** For the calculation of sales or purchase prices with profit margin.
8. **Delta Percent Key:** For the calculation of percentile differences.
9. **Item Print Key:** Displays the number of items entered during a given computation.
10. **Clear Entry/Clear Key:** Clears incorrect entries without clearing previous function or clears all functions except memory.
11. **Grand Total Key:** Recalls, prints, and clears the contents of the grand total memory.
12. **#/Date Key:** For inputting dates or any other code numbers on the left side of the tape, without affecting calculations.
13. **Subtotal Key:** Recalls and prints the contents of the Add/Sub register without clearing.
14. **Total Key:** Depressing this key recalls and clears the contents of the Add/Sub registers.
15. **Numerical Keys:** Ergonomic design makes them comfortable to the touch and easy to use.
16. **Decimal Point Activator Key:** Manual placement of the decimal point location when Add Mode selection is not in use.
17. **Minus Equal Key**
18. **Plus Equal Key**
19. **Percentage Key:** Reduces steps required to make percentage calculations.
20. **Division Key**
21. **Equals Key**
22. **Multiplication Key**
23. **Memory Total Key:** Recalls, prints and clears the contents of the memory.
24. **Memory Subtotal Key:** Recalls and prints the contents of memory without clearing.

25. **Memory Minus Equal Key:** For the results of multiplication/divisions. The calculated products or quotients are simultaneously subtracted from the contents of the memory.
26. **Memory Plus Equal Key:** For the results of multiplication/divisions. The calculated products or quotients are simultaneously added to the contents of the memory.
27. **Standard 2 1/4" Paper:** May be pulled by hand for extra lengths without damaging print head.
28. **High-Speed Printer:** Quick, quiet, and durable. Prints in both red and black with 12 digit capacity.
