The 2410 Portable Electronic Typewriter

Always on the job.

You've got the power of portability with the 2410.

With a weight of little more than ten pounds, the Swintec 2410 will give you a real advantage over most computers. At a small fraction of the cost of a portable laptop/printer combination, you'll still get the work out, no matter where you are . . . and no matter what the work is. Correspondence and memos, of course; but the 2410 will also handle jobs that even top-of-the-line computers have difficulty doing.

Because it has features like correction memory; automatic centering, return, and underline; word delete; a relocation key; and more; the 2410 makes short work of labels, envelopes, and multi-copy forms. And it prints on virtually any kind of paper.

Computers are great in their place. But the Swintec 2410 Portable Electronic Typewriter is on the job anyplace.

SWINTEC 2410 SPECIFICATIONS
